200

Technical information:

Wire classification 6x19S-IWRC (with steel core). Grade 1770 N/mm². Produced according to standard GB/T 20118.

Diameter (mm)	min. tensile strength (kN)	Weight (kg/100m)
8	40,3	26,8
10	63,0	41,8
12	90,7	60,2

Corrosion protection

Each wire is corrosion protected prior to stranding. Coating is Zn95Al5 or Zn90Al10 alloy with coating mass requirement according to EN 10244-2 class B.

3.1 certificate on request.
